

The Step Stuff

Question: What is the step stuff?

Answer: the **step stuff™** is a simple 2-part system that removes yellow-brown stains right before your eyes. One kit will treat an 8' set of steps (4 steps deep). "Swimmer-safe" and easy to use – no pool down time!

the step stuff™ Treatment

Question: How does it work?

Answer: With the pool off (water still)

1. Pour the contents of the step stuff™ liquid out over the step area.
 2. Sprinkle the contents of the step stuff™ powder out over the step area.
 3. Watch the *magic!*
 4. Turn the pool back on and circulate to clean up the other white goods in the pool (eyeball fittings, etc.).

Question: What can I do if only the flat (horizontal) surfaces seem to be cleaning up?

Answer: Without disturbing the still water too much, you can use your pool brush and gently swish the treated water onto the risers (vertical surfaces) so that it can better react with the staining.
