

The Most Important Ingredient in Our Water Conditioning System is...

Their Health!

New Flexible Monthly Program

NATURAL TIME - RELEASED MINERALS PROMOTE BETTER QUALITY WATER

Reduce Eye and Skin Irritation

Fiberstars Catalyst by Jack's Magic is a safe, cost effective water conditioning system designed to supplement traditional chlorine sanitation. By eliminating the need for high chlorine residuals, less combined chlorine (Chloramines) is created, resulting in less eye and skin irritation. Fiberstars Catalyst by Jack's Magic uses Natural Balance™ crystals with time-release water conditioning minerals to promote better quality water.

Fiberstars Catalyst by Jack's Magic is a natural supplement to pool water sanitation. By maintaining a low chlorine residual and occasionally adding an oxidizer you can maintain sparkling, clear swimming pool water, reducing eye and skin irritation.

This Means

*The Purest Pool Water,
the Fewest Chemicals,
Least Work and Lowest Cost
of Any System*

- LESS EYE AND SKIN IRRITATION
- NO MOVING PARTS OR ELECTRICITY
- COST EFFECTIVE
- NON-TOXIC, SUN STABLE INGREDIENTS

Proven Results Since The Early 80's

No matter what kind of pool you have, there's a Catalyst System that's right for you. Join the healthy, happy customers world wide that already enjoy the benefits of the Catalyst System. Your pool can be as fresh and clean as a mountain lake when you use Fiberstars Catalyst by Jack's Magic.

Catalyst Minerals are "Sun Stable"

Our "Sun Stable" minerals are unaffected by water temperature and sunlight. They stay in the water more reliably than chlorine and promote better quality water naturally. Each month you replenish the Natural Balance™ crystals and water conditioning minerals.

- Natural Balance™ crystals time release water conditioning minerals
- Promotes better quality water
- Natural Balance™ crystals unaffected by warm water or sunlight

Simply the best water, fewest chemicals and least work

Fiberstars Catalyst™ by Jack's Magic®

Water conditioning system promotes better quality water!

Eliminate problems and reduce chlorine demand.

The catalyst system uses Natural Balance™ crystals to condition the water and supplement traditional chlorination. By reducing chlorine demand and eliminating the need for high chlorine residuals, less combined chlorine is created, resulting in less eye and skin irritation. The new simple monthly program will result in better quality water with less work. Condition your water nature's way with the Fiberstars Catalyst by Jack's Magic

Pool Water Care has Three Elements

1. A measurable safety residual of chlorine (or bromine) must be present at all times
2. Natural Balance™ crystals to reduce eye and skin irritation.
3. Oxidation power which breaks down and/or alters non-living contaminants introduced by bathers - such as lotions, make-up, body oils and fluids.

THE CATALYST SYSTEM BY JACK'S MAGIC

SAFETY RESIDUAL

Chlorine - Stabilized for outdoor use and added using an erosion type feeder.

CATALYST

Fiberstars Catalyst by Jack's Magic releases Natural Balance™ crystals which promote better quality water. By following the monthly program you can reduce eye and skin irritation while maintaining sparkling clear water

OXIDATION

Depending on the environment and bather load the pool water will occasionally require oxidation. This can be achieved using chlorine, or non-chlorine, shock.
