### JACK'S MAGIC® SALT SOLUTION THE PURPLE STUFF®

Salt solution, **The Purple Stuff**® is designed to meet the demand that salt chlorine generators and high TDS (total dissolved solids) put on a sequestering agent. In addition to removing metals from the water, **The Purple Stuff** also helps to keep silica in solution and helps prevent scaling of the cells in salt chlorine generators.

#### DIRECTIONS FOR STAIN PREVENTION

##### Initial Dose:

Add one quart (32oz.) per 10,000 gallons of pool water. In problem water areas, two quarts are recommended.

##### Maintenance:

Maintenance levels for **The Purple Stuff** are 10 - 12 ppm. To determine the amount of **The Purple Stuff** to add to achieve this level, have pool water tested weekly with a **Jack's Magic Sequest Test™ Kit**. If a **Sequest Test** is not available, an estimated dosage of 6 - 8 oz. of **The Purple Stuff** per 10,000 gallons of pool water may be added on a weekly basis. Please keep in mind that this is strictly an estimate and the only way to accurately determine the appropriate dosage is to have it tested.

#### DIRECTIONS FOR STAIN REMOVAL

Salt Solution, **The Purple Stuff** is not recommended as a stain removal product by itself. In order to determine the appropriate method of removing existing stains, use a **Jack's Magic Stain ID™ Kit**.

#### CAUTION: KEEP OUT OF REACH OF CHILDREN

Contains: Phosphonic Acid

If swallowed, rinse oral cavity, drink large amount of water and seek medical attention. For skin and eyes, flush with water for 15 minutes. For eyes, seek medical attention.
