

# Spa Magic®

- 2 liquid chemicals one time per month
- 2 small tablets and super-shock every 7 days
- trouble-free treatment for one month!\*

**Keeps water crystal clear and wipes out bacteria and algae without eye-burn or smell.**

**\*For spas 250 gal. or under, cut dosages in half and kit will last 2 months.**

# Spa Magic®

## INSTRUCTIONS FOR USE

### **STEP ONE**

First, check your spa or hot tub filter and clean it. If need be, replace the filter cartridge.

### **STEP TWO**

You must adjust the pH. The pH of your spa or hot tub should be maintained in the range of 7.4 to 7.6. For info on how to adjust your pH, call a Jack's Magic® technician at 1-800-348-1656.

### **STEP THREE**

After adjustments, pour into your spa the entire liquid contents of the containers labeled:

SPA MAGIC® WATER CLARIFIER

SPA MAGIC® WATER ANTI-SCALE

### **STEP FOUR**

Immediately after adding the liquids in Step Three, disassemble the Spa Magic cartridge provided with your kit. Place two tablets from the container labeled SPA MAGIC® OXIDIZING TABLETS into the cartridge. Affix the cartridge to the wall of your spa at some point below the water surface using the suction cup. Add 1/4 of the container labeled SPA MAGIC® SUPER-SHOCK into the water.

### **STEP FIVE**

Recharge the cartridge every seven days. To do this, remove cartridge from your spa and insert two tablets from the SPA MAGIC® OXIDIZING TABLETS container. If the cartridge appears empty before the seventh day, WAIT FOR THE SEVENTH DAY TO RECHARGE. If on the seventh day some of the prior tablets remain in the cartridge, leave those in the cartridge and recharge the cartridge normally by adding new tablets. Add 1/4 of the container labeled SPA MAGIC® SUPER-SHOCK into the water.
