- **Waterline & Tile Cleaner**
- **High Gloss Ultra UV Protectant**
- **Cartridge & DE Filter Cleaner**

# Spa Maintenance

## INSTRUCTIONS FOR USE

### **Waterline & Tile Cleaner**

Spray directly on the surface to be cleaned. Lightly brush using Power Blue™ brush, sponge or cloth, and rinse. Safe for all pool & spa surfaces, vinyl, fiberglass, acrylic & tile.

### **High Gloss Ultra UV Protectant**

Clean the surface to be protected with Power Blue™ Waterline & Tile Cleaner. When dry, apply Power Blue High Gloss Ultra UV Protectant by spraying over the surface and wipe dry with a clean cloth. Repeat every 3-6 weeks to maintain long lasting beauty and and ultra UV protection.

### **Cartridge & DE Filter Cleaner**

#### **For Cartridge Filters:**

Adjust spray nozzle to stream, spray inside fabric pleats. Hose off using garden hose with spray nozzle. For best results, let cartridge air dry for fibers to expand.

#### **For DE Grids:**

Open tank DE filters: Drain water from tank exposing grids. Rinse off old DE powder. Spray directly onto the grids until saturated. Hose off using garden hose with spray nozzle. Open inlet valve to allow water to rise over grids. Close inlet valves, drain tank, refill tank precoat as usual.

Pressure DE filters (grids inside closed tank): Drain water from tank, remove lid and hose old DE off of fabric. Remove grids as recommended by filter manufacturer. Spray directly onto the grids until saturated. Hose off.
