

ION SOLUTION

the **ionizer stuff**®

jack's stain program™

**step
3**

PREVENTION

- For use with copper/silver ionizers
- Extends electrode life
- Helps to prevent staining
- Ideal for use with Nature2® and Pool-Frog systems®

SIZES

32 oz.

JACK'S MAGIC® ION SOLUTION THE IONIZER STUFF®

The Ionizer Stuff® was created especially for use with alternative sanitizers using copper and/or silver. **The Ionizer Stuff** enhances copper and silver ions' performance while helping to prevent staining. Unlike a sequestering agent, which removes metals from the water, **The Ionizer Stuff** helps to hold metal ions in solution while maintaining their sanitizing properties. **The Ionizer Stuff** is designed to be used within normal water balance parameters.

DIRECTIONS FOR USE

Initial Dose:

Add 16 oz. per 10,000 gallons or approximately 1.5 oz. per 1,000 gallons.

Maintenance:

Add 16 oz. per 10,000 gallons monthly, or approximately 1.5 oz. per 1,000 gallons.

PREPARATION

The performance of **The Ionizer Stuff** is directly related to the following:

- 1). Proper circulation of the swimming pool water: it should take no more than 8 hours for the water to turn over. Operating time of the filter must provide 1-1.5 turnovers per day.
- 2). A clean filter: clean filter thoroughly before initial application.
- 3). Balanced water: pH, total alkalinity, and calcium hardness levels need to correspond with the ionizer manufacturer's requirements. NOTE: When shocking is *required*, we recommend using **Jack's Magic O₂ Safe Shock®**.

NOTE: Should staining occur, use a Jack's Magic Stain ID™ Kit to determine the appropriate method for removing them.

CAUTION: KEEP OUT OF REACH OF CHILDREN

May be irritating to eyes and skin. In case of contact, flush thoroughly with water.
If swallowed, immediately drink large amounts of water. Call physician.
