

NATURAL MULTI-ENZYME

SUPER PACS™

**PREVENTS BUILD-UP OF OILS, LOTIONS
AND ORGANIC CONTAMINANTS**

INSTRUCTIONS FOR USE IN SPAS

Jack's Magic Natural Multi-Enzyme SUPER PACS™ are a unique blend of natural enzymes developed specifically for pools and spas. SUPER PACS combine the high performance of powerful multi-enzyme action with the biodegradable features of a true "green" product. SUPER PACS break down oils, lotions, make up and other common organic pool and spa contaminants, preventing scum line build up and dull cloudy water. Because of the concentrated bather load in spas, SUPER PACS should be dosed similarly in both a pool and a spa. SUPER PACS are highly concentrated - just one SUPER PAC treats 150 to 5,000 gallons of spa water for 2 weeks. This product is easy to use - simply drop in the skimmer basket or directly into the spa and enjoy beautiful water!

DIRECTIONS FOR SPA USE:

Dry hands before handling. If gloves are available, it is recommended that they are worn when handling this product. **DO NOT** open individual SUPER PAC units (they will quickly dissolve in spa water). Place one SUPER PAC directly in skimmer basket with pump on, then replace skimmer cover. In spas without a skimmer, place SUPER PAC directly into the spa water. For both skimmer application or spa water application, wait 10 minutes for product to dissolve before resuming use of spa. Reseal gold bag or bucket container and store in a cool, dry place. Thoroughly wash hands after handling.

DOSAGE: (1) SUPER PAC every 2 weeks treats 150 to 5,000 gallons of spa water. **NOTE:** for exceptionally heavy daily bather loads, add 2 SUPER PACS every 2 weeks.

CAUTION: Highly concentrated. Irritant. Harmful if swallowed or put in mouth. May irritate eyes or skin. Keep out of reach of children. **DO NOT** get in eyes. **DO NOT** get on skin or clothing.
